

DIANN SHADDOX FOUNDATION
FOR ESSENTIAL TREMOR

Annual Report

Mission: To advance knowledge and recognition of Essential Tremor to the world and find new treatments and a cure.

www.diannshaddoxfoundation.org

From the Executive Director

2024 is our Foundation's 10-year celebration. Since our beginning you have been there supporting us, cheering us on. Now Essential Tremor is finally getting the recognition it deserves.

In 2023 we have partnered with highly connected industry leaders and visionaries from biotech industry, scientists, business leaders, pharmaceuticals, investigators, Essential Tremor groups, and communities invested in discovering new treatments, devices, and a cure for patients with ET. Leaders who believe in our vision to unite the ET community and help them live productive healthy lives. With collaboration, teamwork, and focus there is change in the way the world views ET. Together with critical thinking and innovation, we are driving results by informing the world about ET and inspiring others to join us on our mission.

Also, our worldwide ET community grew exponentially. United we are stronger.

2024 The Year of ET is our time to stop wishing for something to happen but to Make it Happen. We won't give up! There is still so much to do, and your support gives us strength to carry on and move forward. It is a critical time for everyone living with ET to find help and we will not back down until we find the solution. To end ET in our Lifetime.

Together, we will stand strong and show the world we will not be overlooked any longer. May 2024 be our greatest year yet!

Randy Miles
